Location: Bangalore

## OBJECTIVE :

An enthusiastic and inquisitive member of the technology industry with extensive experience using AI as well as languages like Python and Java, who aspires to make an impact by participating in high-impact, real-world projects within a global IT company. Experienced with using TensorFlow, Scikit-Learn, OpenCV, AWS, MySQL, and Git and able to work in both Windows and Linux environments. Interested in using his skills and talent to add value to an innovative organization through data-driven solutions and ongoing professional development.

## EDUCATION :

1. ALVAS INSTITUTE OF ENGINEERING & TECHNOLOGY  
B. Engineering (Artificial Intelligence & Machine Learning 2021-2025) CGPA: 6.53
2. SDMPU COLLEGE Intermediate (2019-2021) PERCENTAGE: 78%

## LANGUAGES :

1. Hindi
2. English
3. Kannada

## PERSONAL INTERESTS :

1. Research.
2. Drone Building.
3. Jet Bot.

## INTERNSHIP :

1. **Salesforce virtual internship** | Salesforce.
2. **AI & Machine Learning Engineer** | VTU & NSDC.
3. **AI Using Python** | GTTC, Hubbli.

## TECHNICAL SKILLS:

1. **Programming Languages:** Python, Java
2. **Cloud:** AWS, Salesforce (SaaS Administration).
3. **Databases:** MySQL.
4. **Version Control:** GitHub.
5. **AIML:** Scikit-Learn, TensorFlow, Open CV, Deep learning (ANN, CNN, RNN, UNET, DeepNet).
6. **OS:** Windows, Linux.
7. **Front-End:** HTML, CSS, React and Angular.

## CERTIFICATIONS :

1. Salesforce Administrator Virtual Internship.
2. AI & Machine Learning (NSDC).
3. AWS Cloud Practitioner.

## PUBLICATIONS :

1. Role of Artificial Intelligence in Automobiles: A Review

DOI: <https://dx.doi.org/10.2139/ssrn.5015474>

## ACHIEVEMENTS:

1. Student Head for Alvas GIS Research Center.
2. Having 40+ hrs of Teaching experience in AI, IOT & GIS.

## PROJECTS :

1. **JETBOT collision avoidance robot (personal project), 2025 Tech Stack:** NVIDIA Jetson Nano, Python, PyTorch, OpenCV, Jupyter Notebooks
  - Built a full ML pipeline (data Collection, Training and Deployment) to run the collision Avoidance Model on Edge Device to Detect Obstacles in Real Time..
  - Integrated JetBot's Camera Feed with the Trained Model and Motor Driver to Enable Automatic Speed and Steering Adjustments When Obstacles are Detected.
2. **Mapping Mangrove Forests of Karnataka using DL and ML Algorithm For Classification:** Conducted a research on Mapping Mangrove forests using a VGG 19, UNET using self processed Sentinel Data also published the book chapter in IISC Bangalore.
3. **TASK MANAGEMENT SYSTEM (personal project), 2026 Tech Stack:** Java, Spring Boot, MySQL, JPA, REST APIs, JWT
  - Built a scalable task management REST API using Spring Boot with a clean layered architecture.
  - Added JWT-based authentication so users can securely manage their own tasks.
  - Developed core features including task creation, updates, deadlines, and status tracking.
  - Implemented pagination, sorting, and filtering to handle data efficiently
